

# BULLETIN OF EARTHQUAKE RESISTANT STRUCTURE RESEARCH CENTER

NO.18  
MARCH 1985

## Contents

<b>Foreword</b>	C. Tamura .....	1
<b>Papers</b>		
"Facilities for Observation and Simulation of Earthquake Motion" and Outline of Studies C. Tamura .....		3
Engineering Properties of Ground Motion Obtained from Dense Seismograph Array Data (Part I: Ground Strain) J. Farjoodi, N. Sato and T. Katayama .....		9
Observation of Earthquake Response of Reinforced Concrete Weak-Model Structures T. Okada and R. Tamura .....		31
Response and Failure Observation of Weakly Designed Steel Structure Models (Part I) A Progress Report — An Outline of the Project and the Preliminary Computer-Actuator On-line Analysis K. Takanashi, K. Ohi and X. Gao .....		39
Response Observations of a Reinforced Concrete Tower Y. Hangai, T. Tanami and T. Yamagami .....		49
Observation of a Three-Dimensional Earthquake Isolation Device to Natural Earthquake Excitation T. Fujita and S. Hattori .....		61
Common Reporting System for Seismic Damage from Destructive Earthquakes H. Shibata .....		71
Seismic Capacity Testing of a Thin Wall 500ton Cylindrical Tank H. Shibata and H. Akiyama .....		73
Discrete Limit Analysis on the Crashworthiness of Structural Components T. Kawai, Y. Toi and N. Suzuki .....		107
On the Energy Absorption of Laterally Loaded Structural Elements under Axial Forces Y. Toi .....		113
<b>List of Papers by the Members of ERS Research Center</b> .....		119
<b>News</b> .....		126
<b>Meetings of ERS Research Center</b> .....		129
