

BULLETIN OF EARTHQUAKE RESISTANT STRUCTURE RESEARCH CENTER

NO.19
MARCH 1986

Contents

Foreword	S. Okamoto	1
Papers		
Ground Motions and Responses Observed during October 4, 1985, Earthquake at Chiba Experiment Station of Institute of Industrial Science		
I. Ground Motions of October 4 and November 6, 1985, Earthquakes Recorded by Dense Seismograph Array		
N. Sato and T. Katayama		3
II. Earthquake Response of Reinforced Concrete Weak-Model Structures Due to October 4, 1985 Earthquake		
T. Okada, F. Kumazawa and R. Tamura		11
III. Response and Failure Observation of Weakly Designed Steel Structure Models (Part 2) Elastic and Inelastic Responses Observed on October 4 in 1985		
K. Takanashi and K. Ohi		23
IV. Observations of Dynamic Soil-Structure Interaction of Reinforced Concrete Tower		
T. Yamagami and Y. Hangai		37
V. Responses of a Three-Dimensional Earthquake Isolation Device to Natural Earthquakes		
T. Fujita and S. Hattori		47
Behaviors of Dams in Mexico Earthquake September 19, 1985		
C. Tamura		53
Slope Stability Analysis during Ground Motion by Means of New Discrete Model		
T. Kawai, N. Takeuchi and M. Mito		65
List of Papers by the Members of Earthquake Resistant Structure Research Center		75
Comings and Goings		82
Meetings of the Members of Earthquake Resistant Structure Research Center ..		85
