

BULLETIN OF EARTHQUAKE RESISTANT STRUCTURE RESEARCH CENTER

NO.23
MARCH 1990

Contents

Foreword	H.Shibata	1
Papers		
Photoelastic Method for Analysis of Stress and Strain in Massive Structure Models using Laser-Light-Sheet C. Tamura, K. Konagai and J.D.Ortiz		3
Flexural Behavior of RM Concrete Block Wall Girders with Large Size Reinforcing Bars F.Kumazawa and T.Okada		13
Numerical Simulations of Collapse of Framed Structures Y.Toi, H.J. Yang and K.Obata		23
Static and On-Line Earthquake Response Tests on 3 Story Frame of a Low-Yield-Ratio Steel K.Takanashi, L. Meng and B.Simeonov		33
Energy Input Rate Spectra of Earthquake Ground Motions K.Ohi, K. Takanashi and Y.Homma		43
An Array Database of Earthquake Ground Motions Recorded at Chiba Experiment Station F. Yamazaki, S. Nagata, T. Katayama, L. Lu and T. Türker		49
Direct and Indirect Snapping Behaviors of Shallow Truss Models S.D.Kim, T. Tanami and Y. Hangai		73
Shear Modulus of Sand Subjected to Simple Shear S. Teachavorasinskun, S. Shibuya and F. Tatsunaka		87
News Letter		
Damage Report of the Loma Prieta Earthquake on October 17, 1989 C. Tamura, K. Konagai, K. Ohi, F. Yamazaki and Y. Nakano		115
List of Papers by the Members of Earthquake Resistant Structure Research Center		125
News		138
Meetings of Earthquake Resistant Structure Research Center		140
